Heating Manager
Your smart assistant to keep you warm.

Keep Oversight

Viessmann Heating Manager was created to give you full oversight over the heating management in your home.

Keep track with current temperatures and power and get an overview over historical data immediately after startup.
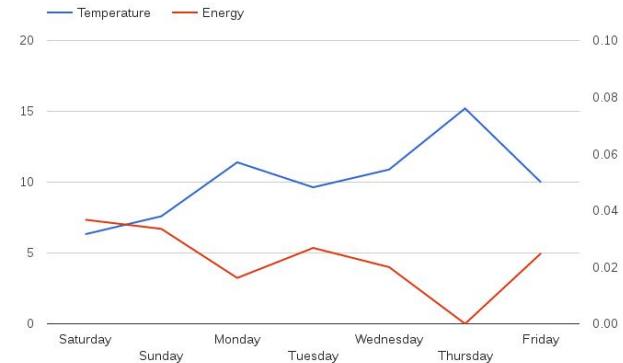

Your Personal Forecast

The forecast page gives you a chance not only to see the local weather coming up next week, but also enables you to estimate heating costs for this period.

Energieverbrauch der nächsten 7 Tage

Sat	Sun	Mon	Tue	Wed	Thu	Fri	Sat
9° 4°	15° 5°	18° 9°	13° 2°	14° 5°	18° 8°	22° 12°	23° 12°

— Temperature — Energy

Pricing Goals

Our tool for setting personal pricing goals enables you to get a forecast how much warmth you will get for a fixed budget in this time of the year.

Zielrechner: Wieviel Wärme für welches Budget?

Aktuelle Kosten € / Tag [14 ▼]

Kosten: 1.23 EUR

Einstellbare Wärme: 15.32 C

Room Configurator

The Room Configurator enables you to individualize room heating to save energy.

Heat rooms within your normal heating periods, or take rooms out of the schedule if they are used infrequently.

Set a single fixed heating period for infrequently used rooms before each use, to ensure comfort while saving energy.

Cost Estimator

Keep costs under control with the builtin estimation tool.

The Cost Estimator calculates your daily heating cost depending on your target indoor temperature.

Future Extensions

- AI based approach for estimation of power usage by taking building and tenant properties into account.
- Automatic pre-heating control based on big data gathered on surrounding, similar configurations fusioned with self-generated historical data.
- Individual room temperature monitoring extending the existing configurator
- Web sockets with status gauge data available on any smart device

Stay comfy!
